⚠ Caution !

Before connecting peripheral devices to the COM port, turn the mode switch to the “OFF” position (**step 1**) and disconnect the power plug from AC outlet (**step 2**).

Initialization (for SE-S300/ SE-S2000)

Initializing the cash register

Automatic initialization

Use the following procedure to initialize the cash register before using it for the first time after you purchase it.

1. Install the two memory backup batteries (see page 10 of the User's Manual).
2. Plug the cash register into a wall outlet.
- At this time, “00000000” appears on the display and the printer operates for a minute. Initialization is complete when the printer stops operating.

CAUTION!

Automatic initialization (which clears all sales and programming data stored in the register's memory) is performed whenever all power (both the backup batteries and power through power cord) is cut from the cash register and then restored. The program data stored in the flash memory is restored.

Remember...

Main power cut by:

- Unplugging the cash register
- Power failure

+

Backup power cut off by:

- Removing the batteries
- Dead or low batteries

=

Automatic initialization when the main power is restored and the mode switch is set to any position besides OFF.

Manual initialization

Use the following procedure to initialize the cash register and clear all transaction data and program data from its memory.

1. Insert the mode key marked “PGM” into the mode switch.
2. Turn the mode switch to the OFF position.
3. While holding down the **FEED** (SE-S300) **JOURNAL FEED** (SE-S2000) key, turn the mode switch to the PGM position.
4. Release the **FEED** (SE-S300) **JOURNAL FEED** (SE-S2000) key.
5. Enter **A** **B** **C** **D** **0** and press the **SUB TOTAL** key. (A, B, C, D: Refer to the section below.)

A. Language selection

This specification defines the language to use for the date in receipt/journal printing.

English	⇒	0
French	⇒	1
Spanish	⇒	2
German	⇒	4

B. Area / monetary mode

This specification defines the area and the decimal position.

German	⇒	4
Two decimal place	⇒	1
No decimal place	⇒	3

C. Department number

This specification defines the number of department keys.

SE-S300	⇒	2 5
SE-S2000	⇒	3 0

D. Program 4 mode

This specification defines Program 4 mode availability.

w/o PGM4	⇒	0
with PGM4	⇒	4

Clearing a machine lock up

If you make a mistake in operation, the cash register may lock up to avoid damage to programs and preset data. Should it happens, you can use the following procedure to clear the lock up without losing any data.

1. Power off the register.
2. Insert the PGM key in the mode switch.
3. Press down and hold **FEED** (SE-S300) **RECEIPT FEED** (SE-S2000), and turn the mode switch to PGM mode.
4. The display shows INIT(SE-S300) / FC (SE-S2000) on alpha-display, then release **FEED** (SE-S300) **RECEIPT FEED** (SE-S2000).
5. Press **SUB TOTAL**. A receipt is issued.

Initialization (for SE-C300/ SE-C2000)

Initializing the cash register

Automatic initialization

Use the following procedure to initialize the cash register before using it for the first time after you purchase it.

1. Install the two memory backup batteries (see page 10 of the User's Manual).
2. Plug the cash register into a wall outlet.
- At this time, “00000000” appears on the display and the printer operates for a minute. Initialization is complete when the printer stops operating.

CAUTION!

Automatic initialization (which clears all sales and programming data stored in the register's memory) is performed whenever all power (both the backup batteries and power through power cord) is cut from the cash register and then restored. The program data stored in the flash memory is restored.

Remember...

Main power cut by:

- Unplugging the cash register
- Power failure

+

Backup power cut off by:

- Removing the batteries
- Dead or low batteries

=

Automatic initialization when the main power is restored and the mode switch is set to any position besides OFF.

Manual initialization

Use the following procedure to initialize the cash register and clear all transaction data and program data from its memory.

1. Insert the mode key marked “PGM” into the mode switch.
2. Turn the mode switch to the OFF position.
3. While holding down the **FEED** (SE-C300) **JOURNAL FEED** (SE-C2000) key, turn the mode switch to the PGM position.
4. Release the **FEED** (SE-C300) **JOURNAL FEED** (SE-C2000) key.
5. Enter **A B C D 0** and press the **SUB TOTAL** key. (A, B, C, D: Refer to the section below.)

A. Language selection

This specification defines the language to use for the date in receipt/journal printing.

- English ⇨ **0**
- French ⇨ **1**
- Spanish ⇨ **2**
- German ⇨ **4**

B. Area / monetary mode

This specification defines the area and the decimal position.

- German ⇨ **4**
- Two decimal place ⇨ **1**
- No decimal place ⇨ **3**

C. Touch keyboard

This specification defines touch keyboard with department or flat-PLU.

- Department keys are allocated ⇨ **7 2**
- Flat PLU keys are allocated ⇨ **0 0**

D. System selection

This specification defines the system (Check tracking system or Non-check tracking system)

- Check tracking system (Check No. = 50, detail No. = 1600) ⇨ **2**
- Non-check tracking system ⇨ **0**

Clearing a machine lock up

If you make a mistake in operation, the cash register may lock up to avoid damage to programs and preset data. Should it happens, you can use the following procedure to clear the lock up without losing any data.

1. Power off the register.
2. Insert the PGM key in the mode switch.
3. Press down and hold **FEED** (SE-C300) **RECEIPT FEED** (SE-C2000), and turn the mode switch to PGM mode.
4. The display shows INIT(SE-C300) / FC (SE-C2000) on alpha-display, then release **FEED** (SE-C300) **RECEIPT FEED** (SE-C2000).
5. Press **SUB TOTAL**. A receipt is issued.

Keyboard layout change

Note:

This page is for SE-S300 and SE-C2000 only.

Keyboard layout change

You can change the keyboard layout or allocate some new functions on the keyboard.

Note:

Before changing the keyboard layout, you must issue the daily and periodic reset reports.

Configuration of the physical key layout

The shadowed keys are fixed function keys. You cannot change the function of these keys.

Note:

The key in programming procedures mean the #-013 key on the keyboard.

Programming the function of each key

Contents	Function code	Contents	Function code	Contents	Function code
Cash/ amount tendered	001	Receipt	038	Subtotal	075
Charge	002	Non-add	040	Receipt on/ off	076
Check tendered	003	Non-add/ no sale	041	Multiplication	082
Received on account	020	No sale	042	OBR	103
Paid out	021	Currency exchange	045	Help	141
Coupon	023	VAT	046	Sign off	150
Reduction (Minus)	027	PLU	048	Tax program	151

Premium	030	Department	051	“00” double zero *1	096
Refund	033	Open	067	“000” triple zero *1	097
Error correct/ cancel	034	Clerk number	072	“.” decimal point *1	098

*1 Two zero key, three zero key, decimal point key can only be allocated in #-011 and #-012 position.

Usage of RAC-12B

The RAC-12B (option device) is a memory stick to save the programming data of the cash register.

Preparation for using the RAC-12B (formatting RAC-12B)

1. Turn the mode key to the “OFF” mode position.
2. Open the RAC connector cover on the left side of the register.
3. After removing the RAC-12B cap, hold the RAC-12B so that the arrow on the stick is on the top and insert it into the slot in the direction of the arrow.
4. Close the RAC connector cover.
5. Turn the mode key to the “PGM” mode position.

6. **7** SUB
TOTAL **2** **1** **1** **0** SUB
TOTAL **0** **2** CA/AMT
/TEND CA/AMT
/TEND

How to backup the programming data to the RAC-12B

1. Check the vacant RAC-12B is set to the slot. (If not, follow “formatting RAC-12B” section.)
2. Turn the mode key to the “PGM” mode position.

3. **7** SUB
TOTAL **4** **1** **1** **0** SUB
TOTAL CA/AMT
/TEND

How to restore the programming data from the RAC-12B

1. Check the appropriate RAC-12B is set to the slot.
2. Turn the mode key to the “PGM” mode position.

3. **7** SUB
TOTAL **4** **1** **0** **0** SUB
TOTAL CA/AMT
/TEND

Error code

If the error occurs, please see the troubleshooting section of the User's manual.

E200: Insert RAC

E201: Illegal Format

Scanning PLU

Summary

You can easily register items with barcode label by using barcode scanner.

Without programming any PLU code, unit price nor linked department, you can register the items and create the PLU programming data automatically by not found PLU registration.

You can input the PLU code by scanning the code or enter the PLU code and press **OBR** manually.

The barcode system of this register is as follows:

Scanning PLU code	Input method		Sample barcode
	Scanner	PLU code manual input	
EAN-13 (PLU type)	✓	13 digits with check digit	
EAN-8 (PLU type)	✓	8 digits with check digit	
UPC-A (PLU type)	✓	10/11 digits without check digit	
UPC-E (PLU type)	✓	6 digits without check digit	

Preparation

Just connect the HHS-15 handheld scanner (option) with the register.

1. Power off the register, and disconnect the AC plug from AC outlet.
2. Remove the connector cover.

3. Connect the scanner to the register and tighten two screws of the connector.

(SE-S300, SE-C300)

(SE-S2000, SE-C2000)

4. Replace the connector cover, reconnect the AC plug and power on the register.

1 DEPT001	.1.00	Barcode*
#123456		
TL	-2.00	
CASH	.2.00	

* These items can be printed by program.

NOTE:

If there is no room for the not found item, this item is overwritten to the oldest item of the scanning PLU file.

After this registration, linked department name is used for this item. If you want to change the item name, refer to "To modify the scanning PLU item descriptor" section of this manual.

Scanning PLU

Unreadable barcode

In case of the scanner cannot read a barcode, enter the PLU code printed underneath the barcode and press the **OBR** key. It is necessary to enter a check digit if you register an EAN-13 or EAN-8 barcode.
